

final edit mindwealth

- Call back errors.
- dropdown options for wk
- Trendlines exports csv still gives call back errors
- Retracements code
- why does the default end date for trendlines show up as 31 dec 2022. can it not be the latest / current date?
- for the trendlines output, i enter an end date as 22 july. and the interval as 1wk --> when i hover on the latest candle it shows the date as 15 July which is a saturday... wheera sin simialr outputs for other functions, we would see 17 july i e start of the week. so why does this show 15 july?
- Vikram when we speak, please help explain the significant of the hover text Lower Slope and Higher Slope and the specificity around when we see Break Above and Break below output using the example of KWEB above for tRendlines function Scroller in dropdown
- Repetitions for fibonacci retracements - as i had mentioned in an earlier comment - discuss when we speak
- etracements seems to be buggy
- Trendlines exports csv still gives call back errors
- Hi Khushang i get no trendlines on the weekly charts even though there are someself evident trendlines i should get in the below example
